

Advanced Manufacturing: Capacity Cost Revaluation

Who is it for?

Advanced Manufacturing: Capacity Cost Revaluation is an application designed for Dynamics 365 Business Central. It aims to supplement some major deficiencies in how manufacturing costing is handled in standard Business Central. The tool enables users to monitor and allocate direct and indirect costs and provides reports to track the optimal allocation of indirect costs based on actual output. Additionally, it enables businesses to perform comprehensive action planning and report on the full allocation history of produced goods.

It is a perfect tool for:

- All companies using the manufacturing module in BC
- Companies having longer production periods, which flow through more than one accounting period, but still want to be able to track actual costs

The application is integrated with Dynamics 365 Business Central.

Advanced Manufacturing: Capacity Cost Revaluation is available on Microsoft AppSource.

How will you benefit from it?

Features

- Keeping track of an infinite number of indirect cost components and setting up their posting.
- Setting forecasted expenses by components and segmenting them into multiple categories of cost that will be automatically added to the WIP.
- Keeping track of past and planned expenditures.
- Maintaining work with a particular capacity cost specified in the route, when renewing the order or cost structure for an item.
- Automatic cost revaluation to match actual costs during the period closing.
- Ability to reprint report for distribution based on an item registry.
- Calculation report for production orders that displays capacity costs by work and machine center, as well as planned and actual material costs organized by category.
- Production costs elements report works with finished production orders and displaying the breakdown of capacity costs and material costs into their individual components.

About us

Employing more than 200 people and reporting 18 years of continuous growth, Intelligent Systems is an international consultancy company that delivers business software projects to local and multi-country organizations.
