

Bulgarian Fiscalization

Microsoft Dynamics 365
Business Central

Who is it for?

Bulgarian Fiscalization extends the sales and accounting functionalities of Microsoft Dynamics 365 Business Central. The solution, developed by the Intelligent Systems team, enables the integration between your ERP system and a fiscal printer, in compliance with the requirements of the Bulgarian legislation and the Bulgarian Tax Authorities.

The established integration could be an effective way to support and automate the enforcement of legal requirements in your sales process.

Bulgarian Fiscalization allows a predefined layout of a fiscal receipt to be sent to the connected fiscal printer when posting a sales order in Business Central. The receipts print forms follow the Bulgarian fiscal regulations and contain all mandatory data.

The current version of the application is compatible with Datecs and Eltrade fiscal printers.

It is a perfect tool for:

- Wholesalers willing to integrate their ERP with a fiscal printer
- Retailers who use the sales orders for their daily sales cash transactions

Bulgarian Fiscalization is available on Microsoft AppSource.

Features

Bulgarian Fiscalization

- Fiscal Receipt data and layout according to the Bulgarian legislation
- Generating and printing fiscal receipts from sales orders
- Supporting different VAT % groups and rates
- Money In and Money Out operations
- Printing of Daily closing statements (X and Z reports) and Periodic reports (Monthly, Yearly)
