

Integration Framework

Microsoft Dynamics 365
Business Central

Overview

Integration Framework is an application, developed by the Intelligent Systems team, that allows you to connect any third-party platforms to Microsoft Dynamics 365 Business Central.

The tool assists businesses in the smooth transfer of information by utilizing an API (Application Programming Interface) simple installation and setting up data mappings in Dynamics 365 Business Central. In addition, the flexible mapping of each standard or customized Business Central Table data makes it possible to integrate many different data sources at the same time.

It is a perfect tool for:

- Companies that are using third-party platforms (e-commerce, 3PL, CRM, BI, etc.) and need to integrate them with Dynamics 365 Business Central.

Benefits:

- Facilitate the information flow and automate the communication process between the other platforms and Dynamics 365 Business Central
- Flexible Tables data mapping setup for standard and custom Tables in Dynamics 365 Business Central
- Configurable communication flow
- Reduces time and effort for manual data transfers and eliminates human errors

Integration Framework is available on Microsoft AppSource.

Features
