

Romanian e-Invoice

Microsoft Dynamics 365
Business Central

Created by

Overview

Romanian e-Invoice, developed by Intelligent Systems, automates the process of sending electronic invoices from Microsoft Dynamics Business Central to the Romanian Agency for Fiscal Administration platform (ANAF). When a sales document (invoice, debit memo, or credit memo) is posted in Dynamics 365 Business Central, the e-Invoice is generated in .xml format and send the ANAF platform automatically.

Moreover, the tool monitors the responses from the ANAF system and updates the submission statuses accordingly. Additionally automatic refreshing of Access tokens for the communication with the authorities is supported by the app.

Romanian e-Invoice extension to Microsoft Dynamics 365 Business Central is designed to facilitate the compliance with the Romanian accounting and tax regulations.

It is a perfect tool for:

- Romanian companies that issue B2B and B2C invoices (e-Invoices) and deal with high fiscal risk products (vegetables, fruits, alcoholic beverages, clothing and footwear, etc.)

The application is integrated with Dynamics 365 Business Central.

E-invoice for Romania is available in Microsoft AppSource.
