

# Romanian e-Transport

for Dynamics 365 Business Central

Created by

intelligent  
systems

# Overview

**Romanian e-Transport** is an application for Microsoft Dynamics 365 Business Central developed by Intelligent Systems. It automates the process of sending e-Transport documents, to the Romanian Financial Authorities in line with the requirements of the local tax legislation for tracking of goods with high fiscal risk, exported and imported.

**Romanian e-Transport** utilizes the sending of notifications and confirmations to the National Agency for Fiscal Administration (ANAF) in Romania for the transportation of goods. The tool generates a structured .xml file that contain data about the sender and the recipient, the goods' characteristics and value, the loading and unloading locations, and information on the mode of transportation. Authorization from ANAF is received with the ITU code once the goods transportation has been reported.

## Benefits:

- Automates the e-Transport reporting process
- Reduces mistakes by eliminating manual data processing
- Saves time by reducing the repetitive actions when submitting many documents

**Romanian e-Transport** is available in Microsoft AppSource.

# Features

- Automatic creation of e-Transport documents from Purchase Orders/Invoices/Credit memo
- Automatic creation of e-Transport documents from Sales Orders/Invoices/Credit memo
- Automatic creation of e-Transport document from Transfer Order
