

Romanian Fiscalization

for Microsoft Dynamics 365 Business Central

Who is it for?

Romanian Fiscalization extends the sales and accounting functionalities of Microsoft Dynamics 365 Business Central. The solution, developed by the Intelligent Systems team, enables the integration between your ERP system and a fiscal printer, in compliance with the requirements of the Romanian legislation and the Romanian Tax Authorities.

The established integration could be an effective way to support and automate the enforcement of legal requirements in your sales process.

Romanian Fiscalization allows a predefined layout of a fiscal receipt to be sent to the connected fiscal printer when posting a sales order / invoice in Business Central. The receipts print forms follow the Romanian fiscal regulations and contain all mandatory data.

It is a perfect tool for:

- Wholesalers willing to integrate their ERP with a fiscal printer
- Retailers who use the sales orders for their daily sales cash transactions

Romanian Fiscalization is available on Microsoft AppSource.

Features

Romanian Fiscalization

- Fiscal Receipt data and layout according to the Romanian legislation
- Generating and printing fiscal receipts from sales orders
- Supporting different VAT % groups and rates
- Money In and Money Out operations
- Printing of Daily closing statements (X and Z reports) and Periodic reports (Monthly, Yearly)
